Controller/Development

PACIFIC HOMECARE SERVICES   MAY 2006 - JUN 2011

Hired to manage major business development for an in-home respite care agency with multimillion-dollar annual revenues. Supervise, train, and evaluate a team of 5 direct reports. Assist with marketing planning and execution, including brochures and website development. Complete accounting/payroll functions involving up to 700 employees. Negotiate leases, design programs, handle permits, and manage database system.

Played a key role in developing start-up from zero to $3.5 million in annual revenues, helping create a competitive organization due to its efficiency. Created short-term and long-term strategic plans, including cash flow that contributed to revenue growth and ROI.

Decreased expenses and improved productivity by optimizing workflow, linking accounting data to labor output, and analyzing expenses in all areas to identify opportunities for reduction.

Implemented tracking systems to capitalize on business opportunities, including follow-up calls after referrals and tracking of mailing and communications. Integrated Filmmaker, QuickBooks, and other computer-based solutions.

President/CEO

MATRISCOPE ENGINEERING LABORATORIES, INC   OCT 1996 - DEC 2015

Directed all activities and functions within a multimillion-dollar firm specializing in geotechnical services, material testing, and inspection. Supervised, mentored, and evaluated a team of 7 direct and 25 indirect reports. Coordinated permits and licenses at the county, state, and federal level. Created policies and procedures, including employee manuals. Developed operational criteria and designed software for the industry. Performed audits to meet quality assurance/quality control objectives. Managed local, state, and federal projects.

Grew the company from a start-up to a $2.5 million organization, building the team from 5 to 36 members focusing on quality of service. Secured (Folsom Dam) as the first major client/project, and steadily increased the client base. Raised competitiveness through pricing and exemplary service.

Built highly specialized staff of engineers, inspectors, and laboratory technicians who earned multiple industry certifications and demonstrated expertise in a broad range of projects over a 9-year period, including local, state, and federal govt. facilities, military installations, and industrial complexes.

Reduced costs by simplifying procedures and conducting research for savings opportunities, making the company economically viable.
